6<sup>th</sup> November 2023

Dear Parent/Carer

You are cordially invited to our annual Science Fair on Wednesday 22<sup>nd</sup> November 2023 at 6.00 pm to celebrate an amazing showcase of science experiments that our students have independently prepared.

As part of our mission to prepare students for life beyond college, students learn about the science and engineering processes used by scientists all over the world to investigate ideas and test hypotheses. Your child will spend time in class during the next two weeks developing an idea that can be tested while designing an experiment that follows the steps of the science and engineering process to test the idea. All parts of the process are written/typed and used to create a display. Pictures will be taken of the experiments as they are conducted and included in the final display.

Parents/carers will have the opportunity to vote for their favourite display/experiment in each of the science rooms where the winning display will receive an exclusive science trophy.

If you would like to attend, please click here and complete the form: <https://forms.office.com/e/FNcgAVWggv>

We look forward to seeing you on Wednesday 22<sup>nd</sup> November from 6.00 pm.

Yours faithfully

Mr P Jeffery  
Head of science and technology faculty
