+	Working above their expected grade
=	Achieving their expected grade
-	Currently working below their expected grade

Attitude to Learning – a summary of Example's attitude, ability and willingness to learn. Further explanation of each level is shown below.

College Average AtL Scale	1: Highly Motivated	2: Engaged	3: Passive	4: Disengaged
Your Child's Average AtL		1.7		
Year Group Average AtL		1.78		

If your child has recently started at the college, teachers may not have yet been able to make an assessment.

Your Parents/Carers information evening on *Date* will give you an opportunity to discuss this report in further detail. Please retain a copy to make reference to during these discussions.

The college has 2 sessions a day an AM and PM session. When a student is absent for 1 day it will appear as 2 authorised or unauthorised absences due to AM and PM session each day.

Progress grades are entered by the subject teacher.

These grades show where a student is relative to their expected grade

The closer the score is to '1' the better the AtL for the student.

1.0 is the highest score possible.

4.0 is the lowest score possible.

The college holds a parents evening for teachers to discuss progress with parents/carers.

Reading age is calculated once the student has completed a reading assessment.

Student's age at the time of the report

Home Learning issues are calculated within 1 week of the report

AtL (Attitude to Learning) is assessed by teachers on student's engagement in lessons and home learning.

1 – Highly motivated Learner

2 – Engaged Learner

3 – Passive Learner

4 – Disengaged Learner

Please see the descriptors for further information

This allows comparison of your child's average AtL compared to their peers.

In this example, the student is scored 1.7 for AtL. The year group average is 1.78, therefore the student's AtL is +0.08 better than their peers, on average.
